

## Supervised Injection Facilities

### Key Stakeholder Organizations

ICER has received input on this review from advocacy organizations, clinicians, clinical societies, and other experts in the field. We invite the public to submit recommendations for key stakeholders in any of these categories. The following is a list of organizations from which ICER has requested input. None of these organizations are responsible for the final content of ICER's report, and it should not be assumed that they support any part of the report, which is solely the work of the ICER team and its affiliated researchers.

For a complete list of key dates and opportunities for input on this project, please visit [ICER's website](#).
